Thursday, June 2d, A. D. 1864, 8 o'-

The board met pursuant to adjourn-

Chairman.

The roll was called by the Clerk, a
quorum being present.

The proceedings of yesterday were read
and approved.

The committee on accounts reported
sundry accounts. See list, from No 1
to No. 8, inclusive, which were all allow-

The committee on finance presented the
following report:

The committee on finance respectfully
beg leave to report:

That bonds, for the purpose of paying
bounties to volunteers, have been issued
by the county to the amount of fifty-three
thousand dollars, and that the interest
already accrued, and to accrue on said
bonds, by the first day of July next, will

amount to about two thousand five hun-
dred dollars. Your committee would,
therefore, recommend that the Chairman
and Clerk of this board be authorized to
raise, by the issue of county orders, bear-
ing interest not exceeding ten per cent.,
of this county—such sum of money not
to exceed the sum of seven hundred and
fifty dollars (seventeen hundred and fifty
dollars having been previously author-
ized), as will be sufficient to meet what-
ever amounts of said interest the county
may be called upon to pay. All of which
is submitted.

R. W. DUNCAN,
BENJ. LILLIE.

On motion of Mr. Brayman the report

the hands of Ledyard, of Grand Rapids,
by the issue of a bond of like amount and
date, payable six years from date, with in-
terest at ten per cent., and to cancel the
said bond No 112.

Which was lost by the following vote:
Yeas—Chester, Crockery, Polkton and
Wright—4.

A NOVEL election bet was recently
made in California. One Gridley agreed
with a Dr. Herrick, to carry a sack of
flour from Sacramento to Clifton in case
the democratic ticket was defeated. He
lost and paid. The sack of flour was
then given to the Sanitary Commission
fund, and put up at auction. The first
buyer gave \$350. It was then put up
again, and brought \$305. It was then
sold and resold during the day, finally
reached the sum of \$4,400. The same
bag of flour is now to be sent to the St.
Louis Sanitary Fair to be sold over again.

CHANDLER HANDSOMELY THRASHED.

—It will give general satisfaction to state
that the amiable Senator from Michigan
(Senator Chandler) has received a first
rate physical castigation at the hands of
Voorhees, of Indiana. He stood a long
time in need of proper attention, and we
hope he is now satisfied. He is the au-
thor of the remark: "The Union won't
be worth a rush without a little blood-
letting."—Cleveland Plaindealer.

ALBION OIL.—The work preparatory
to boring for oil is progressing finely at
Albion. Five derricks are already con-
structed, and the curbing is being sunk
to the sand formation. The engines, five
in number, are on the way and the work
will be prosecuted, we are assured, till de-
cisive results are reached.—Detroit Free
Press, May 30.

THE new cents recently authorized to
be issued have already appeared. They
are made entirely of copper. The cir-
cumference of the new coin is the same
as that of the nickel cents, but they are
thinner and much lighter. It is hoped
that their comparative cheapness will pre-
vent hoarding.

Farm Work for June.

We look forward to the coming season
as likely to be one of severe trial to many
farmers. At the West the spring was
extremely backward, and this has crowd-
ed spring and summer work together most
uncomfortably. The great scarcity of la-
bor everywhere, is but to a very small ex-
tent supplied by a most unexpected im-
migration, and the very high wages de-
manded will lead many farmers, perhaps
unwisely, to "get along" with very little
hired help. Nevertheless it is likely that
prices for farm produce will rule high,
and that the husbandman's labor will be
rewarded. It should be the farmer's con-
stant aim to keep well to windward, be-
forehand with his work, so as to allow
himself plenty of leeway. Then if any-
thing goes wrong, if a week of rainy
days comes, he will be able to weather
the danger and not get set back very
much. The importance of constantly stir-
ring the soil at this season is very great.
Weed seeds sprout rapidly and the young
plants are tender and easily killed. Af-
ter a few days growth it will be hard to
destroy them, and their shade will prevent
the starting of other seeds. It is much
better to have weed seeds sprouted than
dormant in the soil, and ready to come
up just when it will be impossible to kill
them, as occurs where the ground carries
some sowed crops—grass or grain. Deep
tillage and frequent stirring are next to
thorough draining, the surest preventives
against the evil effects of drouth. We
have known crops of both corn and po-
tatoes greatly benefitted by running a lift-
ing subsoil plow drawn by a pair of
horses driven tandem, deeply between the
rows.

BARN.

Ought to be cleared out and put in or-
der for the crops soon to occupy them.
Attend early to all repairs, that damage
do not accrue to crops that the proper
buildings should shelter.

BUCKWHEAT.

May be very profitably sowed at this
season for plowing in as a green manure
crop. Two crops may thus be turned un-
der in a season. The grain sowed now
will not fill well.

BUTTER.

June butter is commonly the best of
the year. The grass is fresh and sweet;
the weather is not so hot that butter mak-
ing is interfered with, and the flow of
milk is larger than at any other period,
so that butter may ordinarily be made in
larger quantities, and better. Milk shod
not be disturbed at all after it is set, un-
til it is skimmed. It should be kept at
a temperature not lower than 55° F.,
and not higher than 60°. Though,
without a cool, spring dairy-room, this is
seldom practicable. The cream ought to
be kept as cool as possible and thorough-
ly stirred every time any new cream is
added. Scrupulous cleanliness, the use
of tin or earthen pans scalded daily and
most thoroughly, good ventilation and
perfect freedom of the air from any odors
of cooking, putrefaction, or any thing else,
but clover blossoms, or new mown hay,
churning at the lowest natural tempera-
ture, never touching the butter with the
hands, working out the buttermilk very
thoroughly, and salting moderately, will
secure butter of an excellent quality,
which, if well packed, will keep the year
round. Scald new firkins or tubs with
buttermilk, and subsequently with strong
brine.

LARGE FLOCKS OF WOOL.—Mr. Henry
Goodyear, of Manchester, writes to the
Ann Arbor Argus as follows:

"I have just finished shearing my
flock of thorough-bred two year old ewes,
forty-seven in number, which sheared over
eleven pounds of clear wool, each of one
year's growth. The highest one, a two
year old ewe, which has raised a lamb,
and weighing but sixty-two pounds,
sheared fifteen pounds and a half. Also,
my three bucks, one three years old,
weighing one hundred and sixty pounds,
shearing twenty-two pounds; one two
years old, ninety-six pounds, twenty lbs.,
and one weighing ninety pounds, shear-
ing nineteen pounds."

WHEAT.—Wheat in the western part of
the State is beginning to head. It is
now thought that by the third week in
June the farmers west of Jackson will
be in the middle of their harvest. The
weather is very favorable to the growing
crop, and present prospects are encourag-
ing.—Dt. Free Press, May 30.

To the lover there are but two places
in all the world—one where his sweet-
heart is, and the other where she isn't.
